Coleman Elks Lodge To Present Dance Revue

If the preview of the dance revue to be staged on Friday and Saturday by Mrs. Holyk's dancing class is any indication of what is in store for those who will see this revue, it will really be enjoyed.

The costumes are beautiful and much credit is due Mrs. Holyk and her pupils for all the work and practice they have put into this revue.

This was a typical dress rehearsal Mrs. Holyk stated. There were yells of "Has anyone seen my shoes?" "Where's my dress?" "Has anyone got a pin, my strap's broke?" heard from all over the hall with frantic mothers running here and there trying to get their child or children dressed for each number. However, it all straightened out and as each number was previewed it could be seen that the two night show would be a sight worth seeing.

Along with this revue a play with the principal characters being Mrs. Polly Purvis, Mrs. Marianne Mozell and Mr. Arthur Graham will be well played and greatly enjoyed by all.

A similar revue was staged here two years ago during rodeo week by most of those to be seen on Friday and Saturday in the Elks hall and sponsored by the Coleman Elks lodge.

Forty-four girls will appear in this revue. These include Beverly Collister, Chris Upton, Linda Skrzyzala, Geraldine Hurd, Mary Ann Atkinson, Rina McLeod, Linda Rokas, April Ingram, Claire Jones. These are all pre-school children.

The older classes to be seen are Linda Fields, Jo-Anne Mizura, Arlene Krywolt, Rose Ann Panek, Ralphina DeLuca, Claire Babro, Doreen Filwich, Joan Mraz, Beryl Anderson, Mariso Cozzi, Judy Vicens, Linda Kitaguchi, Brenda Kwasnie, Judy Cooper, Donna Hurd, Patsy Hurd, Carol Sudworth, Sharon Sudworth, Marie Yakula, Elaine Townsend, Donna Trotz, Barbara Kwasnie, Doreen Wavrean, Gail Yashinoka, Lavinne Bartelli, Carrie Horn, Cynthia Bond, Valerie Kwasnie, Sheila Clarke, Geraldine Panek, Dorothy Binda, Stefann Mraz, Lydia Vrsky, Judy Holyk and Ann Wesko.

The pianist for the dancers will be Miss Gail Vincent.

CNP Men's Softball League to be Formed

Following a set-up similar to last year the CNP men's softball league will be formed soon.

Teams are expected to be entered from the Coleman Legion, Blairmore Legion, Blairmore Miners, Bellevue Legion and Blairmore Dynamiters, last year's league champions.

If you have two legs and at least one arm, it may be your chance to play in the time light of such stars as Ted Williams, Duke Snyder, etc., stars who played on last year's champion Dynamiters.

Elks Hold Regular Bingo

The regular two week's bingo game sponsored by the Elks lodge of Coleman, was held in the Elks hall on Friday evening.

Although the evening was warm and a good crowd was in attendance to try and take home the \$90 jackpot. However, no one was fortunate enough to do this, but Douglas Clarke was lucky winner of the \$5 jackpot consolation.

Other lucky winners of the fine prizes given were:

Grocery hamper, J. Anderson, Blairmore; Kitchen utensils, Mrs. K. Cornett; pin-up lamp, A. Brutok, Bellevue; Revere ware, Mrs. R. Parry; men's wrist watch, Mrs. M. Marache; \$25 cash, Mills Johnson Blairmore; grocery hamper, C. Westley; house coat, J. Sherbruk; table lamp, Mrs. F. Hirst; fishing basket, Mrs. K. Cornett; cigarettes — this prize was split by Mrs. E. Ash and Mr. J. Plante.

Consolation winners were Mr. J. Samshin and J. Feteke of Crows Nest, B. C.

Due to the high school prom being held on Friday, June 1st, the next bingo will be held on Thursday, May 31.

Coleman Fish Game Assn. Enjoy Arctic Films

At the regular Fish and Game Association meeting held recently Mr. W. Kerr, showed some very interesting films on the Arctic, taken while he was there with a surveying group.

Mr. Kerr gave a running commentary as the films were being shown with the whole being very much enjoyed by all those who were present.

At the business meeting plans were formulated to start work again on the dam. A committee has been appointed to look after this project.

The Association will enter a float in the parade to be held in conjunction with the Coleman Rodeo on July 7.

The Fish and Game Association will also sponsor a prize for the largest fish caught this season, the president, J. Chalmers stated.

Remember this contest only includes the actual fish that is weighed by the Association judges. No prize will be given for all those "whoppers" that always get away.

Coleman Collieries "Cat" Sinks in Crows Nest Lake

A DT cat owned by Coleman Collieries, in attempting to cross the narrow part of Crows Nest Lake, sank down on the soft bottom on Friday.

The combined efforts of two huge cats was required for three hours to recover the sunken cat on Saturday. Making the job more difficult was the rise in water overnight due to hot weather.

Miss Frances Dibblee, Mezzo Soprano Captures Top Award for Festival Singing

MISS FRANCES DIBBLEE

Miss F. Dibblee, mezzo soprano of Calgary, carried off the Stutchbury Cup, top award in the vocal classes of the 49th annual Alberta Musical Festival at Alberta College Auditorium.

She sang "O Don Fatale," from Don Carlo, by Verdi, receiving 90 points, and "Der Museusohn," by Schubert.

She is a gold medalist and has twice before been a top winner in provincial festivals.

Adjudicator Jan Van Der Gucht, of London, England, congratulated Miss Dibblee on her wonderful improvement since he had last heard her two years ago. He was particularly complimentary about her performance of Schubert, which he said had "wonderful poise in the top notes." He commented generally on the singer's fine tone and intonation in the difficult Verdi aria.

Nine contestants competed for the Stutchbury Cup. Miss Dibblee has a relatively short experience in the musical world, having begun singing at the age of 20. Her ambition, she says, is to go to Europe for further study.

Miss Frances Dibblee, mezzo soprano, is a Coleman girl, daughter of Mr. W. Dibblee and the late Mrs. W. Dibblee.

She won top honors in the open concert and oratorio classes, and is a winner of the Western Board scholarship in successive years. She studied for two years at the Royal Conservatory of Music in Toronto with Dr. Ernesto Vinci, well known Canadian vocal teacher, and has attended the Banff School of Fine Arts, winning scholarships in 1954 and 1955.

Miss Dibblee is at present living in Calgary and is soloist in Central United Church choir. She has played leading roles in the operas "The Old Maid and the Thief," by Menotti and in Humperdinck's "Hansel and Gretel," given at Banff, Edmonton and Calgary. She is a holder of an Associate of Royal Conservatory of Toronto diploma.

These campaign funds are forwarded to the Calgary headquarters of the Red Cross Society with the local branch being allowed to retain 15 per cent of the campaign funds raised, for the use of the local group, for their work or in case of emergency in their community.

Coleman's New Park Prepared For Tourist Trade

The new park north of the overpass on No. 3 highway has been well prepared for this year's tourist trade. The camp shelter is in fine shape and certainly is a credit to the Board of Trade.

With the completion of the children's playgrounds, which was built by the Lions Club, this fine park will be well attended this summer. The wading pool will certainly draw the young fry.

Town work crews have levelled and planted grass. We understand that the Boy Scouts will build picnic tables and benches. It is

also rumored that a barbecue pit will also be built this year.

The Board of Trade and Lions Club have performed a wonderful service to our town with the efforts they put forth on this park. I have travelled through many towns and have seen nothing finer. Set in a small valley from which one looks out upon a vast panorama of wooded hills backed by majestic snow-capped mountains, this setting will delight not only Coleman people, but travellers as well.

We say well done, fellows.

Coleman Lions elect officers

The Coleman Lions Club recently was officially visited by District Governor Don Thornton of Blairmore. The nominating committee, comprising Mel Dunford and John A. McDonald, brought in a new slate of officers for the coming year, which were elected to office by acclamation. The new slate comprises: President, A. Halderson; first vice-president, Eugene Harbo; secretary, John McDonald; treasurer, Arthur Graham; taitwister Stu Murdoch, and lion tamer, Ted Kryzka. One year directors are Charles Freeman and Duncan, and two-year directors are Charles Roughhead and Graham Atkinson.

Merchanettes Start Practices For Coming Season

The Blairmore Merchanettes held their first practice of the year last Sunday, May 13. Over 15 girls were on hand for the practice with two newcomers expected at the next practice.

Regular practices will be held every Tuesday and Thursday at 6:30 p.m. so any of you sports-minded women interested in playing ball are invited to attend the practices. Karen Haas, Ann Draper and the coach, Frank Rodiniyak will travel to Fort Macleod this Sunday for the purpose of drawing up a league schedule.

Teams expected to enter this year are from Bow Island, Taber, Claresholm, Pincher Creek and Coleman. The girls' team from Coleman, if formed, would not enter the league the first year, but would probably play exhibition games.

The public was well represented at the girls' games last year, proving that entertaining ball is a "must" if the support of the fans survived. See a game for yourself, you will be very pleasantly surprised and I'll bet you will be there for the next game.

Local Red Cross Group Report Successful Campaign

The local Red Cross group have reported a very successful campaign for funds just completed.

This campaign, under chairmanship of Mrs. J. Dick reports that \$765.05 was the sum donated by Coleman residents.

The Lions Club organized the drive by asking representatives from each organization to have representatives help with the canvass.

Mr. Allen, president, and the members of the local Red Cross group all thank the Lions Club sincerely for their help. They also sincerely appreciate the donation given by the Coleman Collieries and all Coleman residents, who helped to make this campaign such a wonderful success.

These campaign funds are forwarded to the Calgary headquarters of the Red Cross Society with the local branch being allowed to retain 15 per cent of the campaign funds raised, for the use of the local group, for their work or in case of emergency in their community.

Bellevue Resident Passes

Mrs. Susan Thom of Bellevue passed away at her home Monday following a long period of ill health.

Mrs. Thom, age 52, was born in Maple Creek, Sask. Prior to her coming to Bellevue two years ago with her husband, who is employed at the Hillcrest CPR station, the family lived at Picture Butte, from 1952 to 1954. Mrs. Thom was a member of the Picture Butte Order of the Royal Purple and of the United Church.

She is survived by her husband Clayton of Bellevue; a son, Baird, and a daughter Patricia of Bellevue, and another son Gordon of Vancouver, and by a brother, Stanley Pollock of Maple Creek.

Advance Sale Rodeo Tickets To Be Held

At a recent meeting of the Coleman Rodeo committee the following prices were set:

Admission to rodeo grounds, on July 7—children 25c, students 50c, adults \$1.25.

In the evening there will be a talent studded variety show called the "Rodeo Revue". It will be held at the arena and will be followed by a free bingo with prizes.

Admission to the variety show is \$1 for adults and 50c for students. All tickets sold, whether for the rodeo or evening performance at the arena will entitle the purchaser to a chance at winning \$50 cash.

Ticket sellers are beginning an advance sale this week and will be around to see you. Arrangements have been made for payroll deductions by the Coleman Collieries, if desired by the purchaser.

It is hoped that all Pass residents will co-operate in making this an outstanding year for the Coleman Rodeo.

Catholic youth camp at Waterton Park projected

Plans are under way for the construction of buildings and facilities for a Catholic boys' and girls' camp to be built at a popular site in Waterton Lakes. It is expected, with the progress being made, that the camp will be ready for occupancy July 1 and will be able to handle fifty campers.

The move for the camp is being sponsored by the Knights of Columbus of Pincher Creek, Lethbridge and Milk River and when ready the campsite will be open to Catholic boys and girls from Lethbridge to the Crow's Nest Pass, also Milk River, Taber, Vauxhall and Fort Macleod. The camp will afford the children a 10-day camp period through the months of July and August.

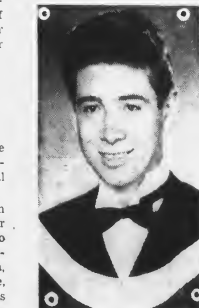

A house-to-house canvass of all Catholic homes will be made in the near future to raise funds for the camp, which it is expected will cost about \$15,000.

Man who gave Blairmore its name is visitor

Although it was not generally known, Blairmore was paid a short visit by M. Blair, the man after whom Blairmore was named.

The name Blairmore was decided upon in the early 1900's after it was decided the siding should have a name. Mr. Blair working in the Pass at the time suggested this and it was suggested that the camp be named Blair. Mr. Blair, feeling that this was too short a name for a town suggested that something more should be added to Blair so a by-standing said well add more to Blair — thus the name Blairmore.

Wins Lieut.-Gov's. Gold Medal

James W. Kerr, son of Mr. and Mrs. Jim Kerr, Coleman, was awarded the "Lieut.-Governor's gold medal at the convocation ceremonies held in the Edmonton Gardens at Edmonton Thursday of last week.

Spr. Felix D'Amico of Hillcrest, tightens bolts during construction of a Bailey bridge by members of the 1st Canadian Field Squadron Royal Canadian Engineers, in Germany. The sappers were taking field training at a bridging camp located near the Pied Piper fairy-tale town of Hamelin.

GARDEN NOTES

Plant vegetables at one or two week intervals is best

For a great many of the vegetables one can and should continue planting at two week intervals right up to the first or second week in July. Beans, corn, carrots, beets, lettuce and other quick growing or maturing vegetables are in this class. By spreading out planting, we spread out and increase the harvest and keep top quality coming along. With this late planting, it is advisable to speed growth with cultivation, fertilizer, and if necessary, watering in warm weather. At the fall end of the season, we can protect from the first frosts with some light cover of newspapers, old bags, or straw.

When the real warm weather starts one should make a few changes. In the flower and vegetable garden, a light cultivation once every 10 days or so will not only keep down weeds but it will conserve moisture and tend to keep plants growing and healthy.

Strictly Fresh

Bronze razor, dating back to the eighth century, B.C., was found recently in Ancona, Italy. Needed sharpening. Our barber's got one to match it in the dustbin, if not in antiquity.

An optimist is a man who believes that some method can be found to infect all TV announcers with laryngitis simultaneously.

Man across the desk from me says that the reason they call it

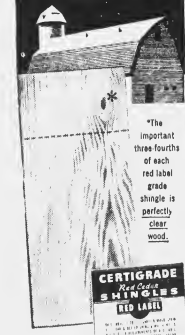

"spring cleaning" is that the job takes all the spring out of one.

This is the season when mothers go crazy trying to keep track of the children they've been longing to turn loose out-of-doors all winter long.

A blueheaded, opinionated person is one who subscribes to a different political theory than your own.

Genuine Cedar at the cost of substitutes

Here is real roofing economy—without a sacrifice in quality! Red Label Certigrade cedar shingles are today's best roofing buy. They provide you three cedar on your roof. Whenever you require cedar shingle roof quality—combined with economy—ask your dealer for Red Label Certigrade cedar shingles.

even in really hot weather. Watering will probably be necessary in some parts of Canada now. Here a lot of mistakes are made by those unfamiliar with the likes and dislikes of plants. One thorough soaking of lawn, flower or vegetable garden, one that will take the moisture down a couple of inches, is worth a dozen sprinklings and it will last for some time. Sprinkling never gets the moisture down more than a fraction of an inch and the roots must come up to the surface to get it, thus exposing themselves more and more to drying and killing by heat and sun. Heavy soaking, however, does not mean turning the nozzles on full blast. The nearer we get to a fine mist the better.

Paths connecting upper and lower gardens or gardens with lower levels, may need some steps. These can be made in various ways; building stones, bricks, concrete blocks or cedar poles staked down with soil or gravel pressed in behind. For a better appearance one should not have more than three or four steps together, except, of course, where the slope is quite extensive, and two or three of such series can be linked with a little bit of level path. Also to add to appearances and interest, we can have the connecting path run at right angles to the steps.

Garden paths may be made of many different materials: flag stones, either natural or cast, concrete, bricks, cinders, gravel, or if traffic is light, a good piece of tough sod.

Where the lot is fairly large, a garden tractor and a power lawn mower will save time and hard work. These machines are not expensive and, given minimum care, they will last for many years. They will do the work at least five times faster than by hand. It is a mistake to purchase too large equipment, especially in tractors. The smaller types are much more easily handled and with attachments will do almost every chore, except heavy plowing.

Loneliest country has woman doctor

Dr. Margaret McKinnon, Australia's first woman flying doctor, has taken up her work at Charleville, southwest Queensland, in some of the loneliest country in the British Commonwealth.

A great deal of Dr. McKinnon's work will be on the pedal rig, giving medical advice to outlying settlers, but she will also be called on to do a considerable amount of flying.

Dr. McKinnon was previously medical superintendent at Norfolk Island. Here the hospital residence was an old sandstone house built by the early descendants of the mutineers from HMS Bounty when they migrated from Pitcairn Island more than a century ago.

DOES MAN'S JOB

Stephen J. Meyers, Jr., 15, is doing a man's job in the Forestry section of Maine. He is chief of the Five Towns Ground Observer post and directs the sky-scanning activities of 25 adult volunteers.

Cigarette-smoking machine used in cancer-tobacco experiment

At the bottom of an abandoned elevator shaft at the chemistry building of the University of Toronto a machine is smoking 600 pounds of cigarette tobacco a week.

Dr. George Wright, of the University of Toronto Chemistry Department, uses the tar, extracted from the smoke by sulphuric acid solution filters, to carry on his investigation of a possible relationship between cancer and cigarette smoking.

The machine will take about four pounds of tobacco at once at cigarette depth—two inches. The tobacco is lit with a blow torch. Financed in part by the Canadian Cancer Society, Dr. Wright and his associates are separating tobacco tar into its more than 1,000 fractions, and sending each fraction to Dr. E. L. Wynder of the Sloan Kettering Institute, New York, who is experimenting with mice.

Dr. Wynder startled the cigarette-smoking world three years ago by producing cancer on the backs of mice by painting them with a tobacco-tar concentration. Dr. Wright and his associates

ACCIDENTAL FUN—Child psychology invades the bandage business with marketing of these new, cartoon-decorated first-aid bands. Tears disappear in a hurry, the manufacturer claims, when small fry spot illustrated band-aids.

Doctor claims abuse blood transfusions

Dr. J. Mitchell Dunn, who administered the first blood transfusion in Columbus, Ohio, in 1917, had a difficult time proving the value of transfusions to contemporaries then, but argues a different tack now.

"Blood transfusions are being used in too many surgical cases today," he said. "It ought to be saved for necessary cases."

Dr. Dunn said he will "never forget" that first patient, Charles Kepler, a coal miner.

"There had been a bad mine accident," he recalled. "He had lost a lot of blood. I had brought equipment for transfusions, a Kimpton-Brown tube, a glass tube-like contraption lined with paraffin so blood wouldn't stick."

"An intern volunteered to give his blood. We drew blood from the intern and pumped it directly into the vein of the miner. We had no blood banks then."

It was successful, and Dr. Dunn read a paper to a medical society. "They tore me apart . . . said patients could get well without transfusions," he said.

"Then transfusions became sort of a cure-all. Even tuberculosis patients wanted transfusions. I don't want to hurt any drives for blood. Lots of people are living today who wouldn't be alive without the blood transfusions they had."

"But there is abuse, and blood should be saved for necessary cases and not be used in trivial operations."

Another use for ironing board

Mr. and Mrs. Jim Gray and Mrs. Carroll McCrea almost left their ironing board behind when they returned to Bellevue, Idaho, from a vacation in Fresno, Calif. Now they're glad they didn't.

Near Wells, Nev., their car skidded and rolled over. The ironing board pinned three Gray and McCrea children in the back seat, saving them from possible serious injury.

BE A COURTROOM DRIVER

Dr. George Tomlinson and Dr. Joseph Robertson have proven that whatever there is in cigarette smoke that might contribute to cancer, it does not come from the cigarette paper. A year ago, two widely-publicized experiments indicated that burning cigarette paper produced a cancer-causing substance.

Dr. Wright points out that there is, as yet, no proof that cigarette smoking has anything to do with lung cancer. No one has succeeded in producing a lung cancer in animals with tobacco tar.

SEW-THRIFTY

Quickly made wrap-on for your daughter

4634 2-10 by Anne Adams

A Wrap-on for your daughter! Just sew two or three, Mother—and RELAX for the season! As you see, it has FEW pattern parts, whips up in a jiffy, opens out to iron and a child can dress herself so easily! Make it of cotton in flower-fresh pastel colors!

Pattern 4634: Children's Sizes 2, 4, 6, 8, 10. Size 6 takes 2½ yards 35-inch fabric.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35¢) in coins (stamps cannot be accepted) for this pattern. Write plainly: Size, Name, Address and Style Number and send orders to: Anne Adams Pattern Dept., Department P.P.L., 60 Front Street W., Toronto.

Rare operation permits woman see sky again

A rare spinal operation has given 40-year-old Miss Edith Mann of Sydney, Australia, her first look at the sky in two years without having to lie on her back.

The operation involved surgically fracturing the woman's neck and restoring it with the head in an upright position. Known as osteotomy of the spine, it has been performed only a few times in Australia.

Two Sydney surgeons, a neurosurgeon and an orthopaedic surgeon performed the operation at a North Shore private hospital.

Miss Mann suffered from an arthritic condition of the spine, called ankylosing spondylitis. It prevented her from moving her head, which became fixed in a forward position so that her line of vision was directed at her feet. She was warned before the operation that she might die during the operation, or that she might be crippled for life if it failed. Miss Mann said she did not think too much about the risks because she had so much to gain if the operation were successful.

BEDDED ON BOMB

A resident of Kiel, Germany, slept for 11 years on top of an incendiary bomb, it was discovered recently when he changed homes and the new owner discovered the bomb embedded deep in the floor, right under the bed. A disposal squad removed the bomb, which had been there since a raid in 1945.

Runs car on unique liquid

A Tonawanda, N.Y., motorist says he runs his automobile on liquefied petroleum gas at nearly one-third less than the cost per gallon of gasoline.

Richard D. Voigt has driven his car about 50,000 miles and claims use of the fuel has saved him 50 percent or more in operating costs. What's more, he says, the fuel burns so cleanly that the crankcase oil doesn't get contaminated. He's actually changed the oil in the car only twice.

Voigt said he spent a little less than \$300 for parts in the conversion to the butane and propane fuel. By the flick of a switch, he also can run his car on regular gasoline.

Voigt stores his unique liquid propellant in two 20-gallon tanks in the trunk of his 1941 car. He gets good mileage, but figures he could get up to 30 miles per gallon if a higher compression ratio could be used.

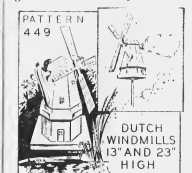

Germs always with us

The germs of tuberculosis are frequently encountered by most people, who, however, do not contract the disease because their resistance is not low. TB may establish itself and remain undiscovered by the victim until intensive treatment is required to cure it. Where the disease is present, it can be discovered by chest X-rays, and modern methods of treatment can almost always effect a cure. Chest X-ray examinations are available free of charge in Canada and they are no more trouble than an ordinary snapshot.

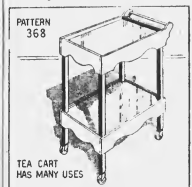

FOR YOUR HOME

Dutch windmill weather vane; handy tea cart

Two sizes for this Dutch windmill are given on the pattern in an attempt to comply with readers' requests for this project in heights from six inches to four feet. The two sizes given seem to be the most popular. Both are built up solid with workshop scraps. The top layer carries the weather-vane and is pivoted to the base and roof so as to whirl freely in the lightest breeze. This pattern will

be mailed for 35¢. It also may be ordered with the Weather-vane Packet of patterns ranging in size from small comic action windmills to large decorative weather-vanes for barns and garages. The price of this packet is \$1.50.

Now, with all the wonderful heat-proof materials that are available at small cost, for the top and bottom of this design, the toaster, waffle iron and coffee pot may be wheeled around the house wherever needed. This double-deck style is especially handy beside the dining table to hold vegetable dishes and dessert; to take care of used dishes and avoid those extra trips to the kitchen. Once you have this tea cart in the house many new ways will be found to use it. The pattern illustrates each step in sawing and assembling. Use fiber or rubber casters available at hardware stores. Price of pattern is 35¢ postpaid. Address order to:

Home Workshop Patterns Department P.P.L., 4183 West 5th Avenue, Vancouver, B.C.

Gives baby girl to woman admirer

A woman standing in line at a bus stop in London, England, admired a six-month-old girl held in her mother's arms. The mother told the woman she could have the child and she took her.

"I was so thrilled! I always wanted to have a baby," the woman told a London magistrate recently. She said the child's mother told her she could not afford to keep the baby and because she was a Cypriot she thought she could not get her adopted. The woman's doctor called police when she took the child to him for advice.

The magistrate put the child in the care of the London county council while investigations were made to determine whether the woman should be allowed to adopt it.

How relaxation can help your golf

Ever hear a golfer complain that he's "tightened up" and duffed his shot? Well, chances are he's right, because muscle tension is a major cause of poor golf, even among golfers with apparently efficient mechanical techniques.

Studies of golfers have revealed that tension hits them particularly in the muscles of the jaw, shoulders and diaphragm. This tension prevents the proper functioning of the key muscles, and spoils the shot.

Chances are if you're a golfer, this is a problem with you. Here's a hint that may help solve it, if you work at it. The idea is to associate a controlled exhale with each shot, because the body usually relaxes involuntarily during an exhale.

To do this, take a deep breath as you swing the club back. Then associate the exhale with the actual shot. Your exhale will be more explosive in a drive, of course, than it is in a putt.

A certain amount of practise is needed to associate the shot and the exhale properly, but the time and effort are definitely worthwhile investments.

How fat is too fat?

It is now generally agreed by people who have studied the question of whether superfluous weight interferes with athletic skill, energy and endurance, that even the smallest amount of unnecessary weight can be detrimental.

Sports College adds another expert to staff

TORONTO. To handle the increasing work load created by the recently announced Canadian Amateur Sports and Physical Fitness Development Service, Sports College has added another physical education expert to its staff.

He is Doug MacLennan, Toronto born graduate of Bowdoin Green College University, Bowling Green, Ohio, where he obtained a bachelor of science degree in health and physical education.

With a fine background in competitive sport, including football, wrestling and track and field, Doug has written many outstanding papers on conditioning and physical repair of the body. It is expected that his wide knowledge of sport, physical education and associated subjects will become a vital part of the enlarging scope of CASPDS.

He will be personal to technical assistant to Sports College director Lloyd Percival, with special attention to testing and research. His duties also will include preparation of instructional material for the Sports College publications as well as speeches and the preparation of material for movies and the radio and television shows. He has become a regular fixture on the regular weekly Sports College radio session, carried coast-to-coast by the CBC.

On The Side : By E. V. Darling

Have you what is described as "a common cold"? Don't treat it too lightly. Take things easy. Keep treating the ailment, especially if you are over 40. George Washington's death resulted from a neglected cold. In his funeral oration, General "Light Horse Harry" Lee described the cause of Washington's death as follows: "A slight cold disregarded, became inconvenient on Friday, oppressive on Saturday, and defying every medical intervention, before the end of Sunday put an end to the best of men."

Of births and burials

The British do much worrying about the possibility of being buried alive. In London there is an organization known as The Society for Prevention of Premature Burial. Among those who were buried when sweet 16, must be included Mrs. Olivia Dione, mother of the quintuplets. In 12 years of marriage Mrs. Dione gave birth to 12 children.

Formality at all costs

One of Tokyo's best patronized sports is horse-racing. The Japanese tracks use the pari-mutuel wagering system. The Japanese are enthusiastic horse-players. The principal Japanese turf paper equivalent to our racing form, is called "Sincere Advice On Current Race-horse Performance". The professional Tokyo tipsters call themselves "race-horse researchers". They are unionized. Their organization is called "The Honorable, Democratic and Peace Loving Union of All Japanese Race-horse Researchers".

So they say

Am asked if it is a fact that London policemen are unarmed. It is. Members of the London Metropolitan Police Force do not carry guns. Many men are giving themselves a gaily rejuvenation treatment but don't realize it. It is said shaving every day aids a man to maintain a youthful appearance because the operation exercises the face muscles. . . . It has been wisely observed that the five essentials of happiness are health, freedom, economic independence, congenial work and reciprocated love.

Light-haired not always light-headed

Tiziano Vecelli, the Italian painter, better known as Titian, who had the honor of having a type of blonde named after him, was still painting blondes at the age of 99! Shows what an interest in blondes will do for a man. . . . Frequent references are made to females who are "beautiful but dumb". The fact is that beautiful women are rarely dumb. Brainsy people of both sexes are usually much better looking than unintelligent people.

SITTING ON A RUMOR—Aquanaut Sally Ardrey brings the dying saucer stories down to water level. She skims across the surf on a disc-shaped version of the water sled. This is the newest thing in water-borne fun at Cyprus Gardens, Fla.

:: GEMS OF THOUGHT ::

GOOD MANNERS

A polite man is one who listens with interest to things he knows all about, when told him by a person who knows nothing about them.

—De Morny

And life most sweet, as heart to heart.

Speaks kindly when we meet and part.

—Mary Baker Eddy

We cannot always oblige, but we can always speak obligingly.

—Voltaire

Tact consists in knowing how far we may go too far.

—Jean Cocteau

Good manners and soft words have brought many a difficult thing to pass.

—Aesop

Grand opening

The annual opening of the summer cottage is an important affair. At this time, a thorough survey should be taken of the building, both inside and out. Floors, walls and ceilings may have developed breaks that could be dangerous. Stoves, pipes and chimneys may have become unsafe through misplacement, rust or other winter effects. Window and door screens also need inspection to ensure that no opportunity exists for the entry of disease-carrying or stinging insects. The natural water supply, such as a well, should be tested, for purity since conditions may have changed to cause the water to become contaminated.

Good manners are made up of petty sacrifices.

—Emerson

Quick Canadian Quiz

1. Name the six Great Lakes.
2. What is the average annual cost to the Canadian motorist of license fees and gasoline taxes?
3. What percentage of Canada's railway mileage is west of Fort Williams?
4. By what percentage does Canada's population increase yearly?
5. Of Canada's 3,685,000 families at June, 1955, how many were childless?

ANSWERS TO QUICK QUIZ

1. 1,155,000 were childless.
2. More than half.
3. Lakes Superior, Michigan, Huron, St. Clair, Erie, Ontario.
4. During 1955 by 2.45 percent; 1954, 2.69 percent; 1953, 2.63 percent.
5. About \$85.60 in license fees and gasoline taxes only.

Hemoglobin 'bust' aids research blood disorders

Two University of Rochester scientists have broken down the structure of hemoglobin — a feat expected to aid research into blood disorders and anaemia.

After one and one-half years on their project, Dr. Martin Morrison and Dr. Jean L. Cook, were able to "bust" blood hemoglobin into its three molecular components.

The scientists explained that their discovery would not be of immediate aid to people suffering from anaemia or blood disorders, but they said it was an important step towards discovering a cure for such maladies.

The research project was sponsored by the National Heart Institute.

Imperial war graves commission honors dead in many lands

With the travel season soon upon us, thousands of Canadian veterans of the two World Wars will be revisiting Europe and the scenes of war which are indelibly stamped on their memories.

To mention Vimy or Ortona, for example, is for a veteran to be instantly reminded of the wars and of comrades dead and buried in a foreign land.

Yet even the World War II veteran will only with difficulty find the physical evidences of fighting outside certain devastated cities.

It is when the sign of some crossroad or lane — end points out to the tourist the existence of a beautiful war cemetery deep Sacrifice; and the largest cemeteries have a huge stone slab called the Stone of Remembrance.

In charge of these cemeteries, scattered throughout the world, is in the country that the imagination really begins to work upon things that were.

These cemeteries, some of them wholly Canadian, have come to mean a great deal to ex-servicemen. Rare, indeed, is the veteran who, on a trip to Europe, does not visit one or more.

Little is known in this country, however, of the organization which developed and has maintained these cemeteries in such an admirable fashion. The visitor, indeed, does not have a feeling of sadness on entering them. The headstones are spread out in perfect order; usually there is a beautiful monument with a Crusader's sword known as the cross of the Imperial War Graves Commission, of which the Duke of Gloucester is president. Each Commonwealth country is represented on the commission, usually by the nation's High Commissioner stationed in London; and each country pays a fixed percentage towards the upkeep of the cemeteries.

The Imperial War Graves Commission was formed in 1917 following the deliberations of the Imperial War Conference with the resolution approving its charter being moved by the then Canadian prime minister — Sir Robert Borden.

From the beginning, leading architects, stone craftsmen and landscaping experts have combined their skills to make the last resting place of those who died in action, or as a result of action, places of peace and dignity where their memories can be honored.

Although Canada does not have a national cemetery, or a war cemetery as such, the Imperial War Graves Commission is represented in this country by a secretary — general, a former Canadian gunner and staff officer by the name of Charles B. Fuller. He assumed the post some three years ago.

A native of Brantford, Ontario, Mr. Fuller is concerned about Commonwealth war graves throughout the world but his primary responsibility is the care of graves in North America.

The graves of former servicemen, ranging in numbers from two to four hundred are located in 3,000 cemeteries across Canada. The Commission bore the expense of erecting headstones and maintains the graves. Canadian and Commonwealth servicemen also are buried in other parts of North America and the commission provides for adequate care of their graves as well.

The grave of the fabulous Brigadier Wingate, of Burma fame, located in Arlington Cemetery in Washington, D.C., is for example, Mr. Fuller's responsibility. Although Wingate crashed in Burma, the plane in which he was travelling carried a majority of Americans, the reason why his remains were brought to the United States.

Those servicemen whose last resting places are unknown also are commemorated. About two years ago the commission completed a memorial on Citadel Hill, Halifax, to officers and men of the Royal Canadian Navy and Canadian Merchant Navy and Canadian soldiers who lost their lives in the Second World War and have no known grave but the sea.

No distinction of rank is made when graves are the responsibility of the commission. Private or Field Marshal, the serviceman lies beneath a simple, upright headstone of granite or some other stone of uniform size, on which is engraved his rank, name, unit, date of death, age and a personal inscription from his next of kin. In the case of a Victoria Cross

winner, the insignia of the V.C. is carved on the headstone in place of the cross. In Canada, the use of granite for headstones is demanded because of the fine finish of this stone requires cleaning only once in every 30 years or so and is ideal for finely-detailed carvings.

There is a certain amount of confusion among Canadians concerning the graves of those servicemen buried in Canada whose maintenance comes under the jurisdiction of the Imperial War Graves Commission.

The answer to the confusion lies in the fact that, for commission purposes only, World War I ended on August 31, 1921, and World War II on December 31, 1947. The graves of veterans who died in Canada as the result of service disabilities before those dates are the responsibility of the Imperial War Graves Commission.

Since the Korean action was not legally classified as a war, no ruling has yet been made with regard to the graves of Korean casualties.

Gems of Thought

A young woman about to be married decided to test her sweetheart, and called on a girl

friend. "I want you to go for a walk with Jack," she confided. The waitress was wondering why the elderly man was eating while "and at a suitable moment ask him for a kiss."

Her friend blushed, but consented.

The following day the bride-to-be called round to see what had happened. "Did you ask Jack to kiss you, dear?"

"I didn't get a chance," was the rather upsetting reply. "He asked me long before I'd thought of it."

Fascinating display in zoo

A fascinating addition to Edinburgh zoo is the new Insect and Rare Bird House. The centre of attraction is a large display case wherein an army of ants can be closely studied through movable magnifying lenses.

There is also a glass hive which enables onlookers to watch bees as they enter, laden with nectar, through a glass tunnel and fill the cells in the "larder" or pass on to the "nursery" in which the cells contain young bees still in egg form. The queen bee has been specially marked with a white spot so

that she may be easily recognized. A charming exhibit is a glass-walled room inhabited by beautiful methods and butterflies, and tiny brilliantly colored humming birds which hover motionless in

the air, their wings beating so fast as to be quite invisible to the fascinated onlookers.

Three-day church conference will be held at Waterton

"Every Occupation a Christian Calling" will be the theme of a three-day conference for all men of the United Church of Canada to be held for three days commencing June 15 at Waterton Lakes National Park.

It will be the first such annual conference held in Southern Alberta.

FEATURED SPEAKER

Rev. B. Oaten, a graduate of Toronto, Boston and Columbia universities and at present director of the Christian workers' centre of the United Church at Paris, Ont., will be the featured speaker.

Mr. Oaten's work has taken him throughout Canada. Most of his work has been with the laymen of the United Church. He has served churches at Vancouver, and Trail, B.C., and also served ten years as youth director in California.

The conference is being spearheaded by the Lay Council of the South Alberta Presbytery and is one of many being held across Canada by the church. Vernon Gains of Pincher Creek is general chairman in charge of all arrangements for the conference, including accommodations at Waterton Lakes for the three-day event.

The South Alberta conference follows a similar western Canada conference held at Banff last year. The Banff conference was considered a huge success and the laymen attending have spread the idea throughout their local areas. It is estimated that between 150 and 200 laymen from throughout Southern Alberta will attend.

Registration forms are available at the United Churches in the Pass. Total cost including board and room will be \$18.00.

The value of boxing

By WALTER R. THURN.

North Battleford, Sask.

No sport has received as much unfounded criticism as boxing has in the last two decades; no sport has been as sadly misunderstood as boxing is.

It is commonly agreed among the exponents of this art, that no one can fully appreciate this, apparently cruel sport unless they have participated in it in some form; if only as a good fan. What appears to be ruthless abuse of the human body is simply a display of excellent physical condition and dexterity.

It is not the matter of abusing one another in the ring, but a test of skill and endurance. See, do we find boxers angry in the ring, and when this does happen it is extremely detrimental to the victim of this lack of control. On the contrary, opponents, are more frequently on friendly terms, which is also frequently displayed in the match. There are few better tests of sportsmanship and self-control than a high-calibre competition between two well-conditioned athletes. We seldom, if ever, see gross misconduct, or disregard for the rules in the rings, as is so common in many other games. Furthermore, when competitors are keyed up and anxious for victory one would expect the latter, but it never seems to result.

Not only does it teach great consideration, and good sportsmanship in the ring but this is also found equally outside the ring. Good boxers never use their ability or advantage outside of the ring.

It is commonly said that, "anyone who boxes in a ring never fights outside it, and anyone constantly fighting outside the ring never seems to enter the ring." We may, however, not uncommonly find the boxer defending the right, or anyone at a disadvantage.

Let us look at another angle, training. This fine sport utilizes such a wide variety of training, that this itself is of the great value. Running, one of the most valuable and enjoyable exercises is frequently used in training; as is its equivalent—skipping. This may be varied in dozens of ways. No other exercise of equal value may be performed in such a small space as skipping, or with such a little equipment. One may skip in a basement, or on a porch, or even on a walk.

Other common conditioning exercises such as bag punching, limited weight lifting, push ups, parallel bar or trapezoid work are only a few of those commonly used.

Good physique and good health which invariably accompany this

Old? Get Pep, Vim

Feel Full of Vigor, Years Younger
MEN, WOMEN (40, 50, 60, Don't be old, weak, worn-out all in, exhausted. Try Derré Tonic Tablets. Often needed after 40—by body old, run-down because lacking iron, increases vim, vigor, vitality. Thousands feel full of pep, years younger. Get Derré Tonic Tablets. Trial size costs little. Or Save Money ask to see Economy size—gives you 3 times more. At all drugists.

are themselves priceless human assets not easily achieved, or readily lost.

Regular training, like most other regular practices soon becomes more or less habitual and thus, of permanent value.

Only a well-conditioned athlete knows the feeling and effect of training and will prize it for such.

The above items are only a few of the innumerable advantages and uses of this manly art.

Check electrical equipment

Many fires in homes and business premises are caused by faulty electrical wiring or appliances.

This is often due to wiring or installation being done by non-qualified people or the use of materials not up to the standards of the Canadian Standards Association. All appliances or equipment which meet the requirements of the CSA have been thoroughly tested for fire and shock safety and accordingly bear the CSA approval mark.

World Happenings In Pictures

SUITED FOR TROUBLE—Crewmen of an Air Force B-52 Superfortress line up for briefing clad in skin-tight pressure suits at Castle Air Force Base, Merced, Calif. Ribbing on suits is composed of a series of tiny bellows which can be expanded by means of pressure hoses or inflation bottles. Pressure helps prevent damage to organs or circulatory system at extreme altitudes or in case of pressure failure in the plane's cabin.

SPRINGTIME—Boy, bat and ball belong to no particular locality. The fact that this picture was taken in Minneapolis, Minn., is of incidental importance. What IS important is that the days are longer, there's a vacant lot down the street and Willie has a bat and ball...

BEST HELP AVAILABLE—You couldn't hire this top mechanic for love or money. He's Walter Reuther, AFL-CIO vice president, at work on a news photographer's car at Logan Airport, Boston, Mass. The long-time chief of auto-dom's labor forces paused on his trip home from India to locate and fasten a loose wire for the harried lensman.

RARE KIDNEY OPERATION—Mrs. Edith Helm, 20, of Sand Springs, Okla., and her twin Mrs. Wanda Foster, right, arrive in Boston for a rare kidney operation, if hospital tests prove they are identical twins rather than fraternal twins. The hospital plans to transplant one of Mrs. Foster's healthy kidneys into her sister. A similar operation was performed successfully in 1954 on two male twins.

HE PUFFED WELL FOR GLORY OF RCN—Jacques Lachade, who represented the Royal Canadian Navy in the International Pipe Smoking contest, was top man among the Montreal entrants. He kept his pipe going for 78 minutes and 45 seconds. Johnny Lemay, a local policeman, who puffed for the glory of Canada, dropped out of the race after 56 minutes and 30 seconds. However, neither entrant had the spark to capture the world championship. It went to C. Kaganan, of The Hague, Holland, for a record-breaking time of 124 minutes and 11 seconds.

UMP TO WEAR GLASSES—The customers won't be able to tell Umpire Frank Umot to "get glasses" in future games. He's the first major league ump to wear glasses while working.

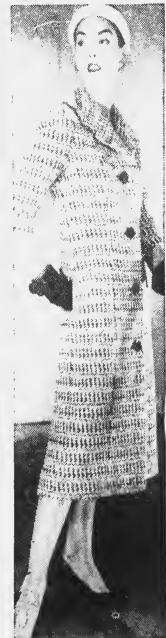

SEES HIS CHILDREN FOR FIRST TIME—War vet Bernard Hreha, 34, of Cleveland, Ohio, blinded in an accident eight years ago, reunites with his wife and children whom he had never seen, after an operation restored sight to his right eye in Veterans Administration Hospital, Philadelphia. The children are Carol Jane, 18 months, and Peggy, three.

BENGAL TIGER CUB—One of the two Bengal tiger cubs which arrived in Montreal aboard the SS Irmingard enroute to the Granby Zoo is given lunch of horsemeat by crewman Helmut Godejohn. The cubs are from the Copenhagen Zoo in Denmark and were shipped from Hamburg, Germany. Granby is sending some beavers to Copenhagen in return. Capt. Karl Becker said the "passengers" weathered the trip well.

WHO TURNED OUT THE LIGHTS?—Coley Wallace, one-time heavyweight title contender, is aided by handlers after being knocked out by Bob Woodall at Boston.

COAT LENGTH IS NEWEST SWEATER—This cardigan sweater has been elongated to coat length. Designed by Monte Sano and Prusan of New York it is in a refter style in black and white wool.

OUR COMPLETE SHORT STORY —

trap robber

—By KERRY WOOD

THE Devil Beast has been here!"

Og-hin-sha the Stony studied the trap-set, black eyes brooding on the havoc. Carefully hidden traps had been dug up, each one mockingly exposed and the bait taken. To make matters worse, the animal for which the Indian had so laboriously set the traps had come this way the night before and stopped only a dozen yards from the rine! set. Had the traps been undisturbed, Og-hin-sha might now be putting a priceless pelt in his knapsack.

Instead, the evil wolverine had spoiled the set. Only a cunning wolverine would have dared to stalk onto a set and nosed out the chains, pulling each trap from its place of concealment. And bait once defiled by a wolverine was spurned by every creature in the woods.

Og-hin-sha gathered the traps and dropped them in his bag. The setting was ruined; he would have to try some other spot. On he trotted, his snowshoes clicking faintly as he followed the winding trap-line.

"The beast has followed my trail!"

That meant the next set would also be ruined. There he had built a tiny log pen with a small opening in the roof. A marten set, with a dead squirrel for bait inside.

When he came in sight of this set, the Indian's face became grim. Because he had caught a marten, and marten skins were worth sixty dollars each. But the wolverine had come along and smashed the Stony's log pen to reach the prize, and scattered bits of marten fur told the rest of the story. The vicious-jawed Devil Beast had torn the slender fur-bearer to shreds.

All along the trap-line the story was the same. The wolverine ruined every set. And whenever an animal had been caught, the trap-robber had ripped it apart to find the trapper's gains. By the end of the day, Og-hin-sha's rage made him swear vengeance.

The angry Stony worked out a wolverine set that was apparently too simple to succeed. A log-walled pen with a generous chunk of bait inside, with an opening at either end of the enclosure. A dozen feet back from the pen, he placed a large trap. A yard from this, still in line away from the pen, another. And a third trap a few feet farther back.

There was cunning in his plan. Og-hin-sha knew the way of the wily wolverine. The robber always stalked straight up to a pen-set, expecting to find the traps close to the bait. So the two openings that were trapless would baffle the animal. Nor was there a trap inside the pen near the bait, and this would also puzzle the beast. Because the wolverine always seeks to find and expose the trap before it tangles with bait.

So when it could find no traps around the pen Og-hin-sha had built, the beast would become cautious. As a result, it would back away and circle the set. Walking around anything suspicious is characteristic of all animals, the wolverine being no exception. And when the Devil Beast circled the baited pen, Og-hin-sha hoped that the robber, eyes on the puzzling pen, would place an unsuspecting paw in one of the waiting traps.

The Indian built the set on the last of his three trap-lines that

radiated from his central cabin. The wolverine had already visited two of his routes, forcing him to lift the traps. Time enough to set them out again when he had caught the marauder, for he knew that the wily wandering wolverine would shortly discover his remaining trap-line.

So he placed the simple set on this line, near the middle of the elongated loop that started and ended at his cabin. The animal would follow the trap-trail from whatever point it chanced to join the loop, and Og-hin-sha reasoned that if it discovered and wrecked several ordinary sets before coming to the robber-set at the end of the loop, perhaps the Devil Beast would not be so cautious then. Day after day he tended this solitary line, patiently waiting for the marauder to find it.

Then came the morning when he saw robber tracks again. Not wolverine marks this time, but man-prints. The tracks were indeed like the Indian's own prints, but he scorned to believe that the thief was a full-blooded member of his own proud tribe. A wandering half-breed, skulking along honest trappers' trails and robbing their sets of fur. This thief had sneaked along Og-hin-sha's lines in other years, and the Stony's eyes gleamed when he recognized the hated tracks. They were only a day old this time, and a day's start was not too great a lead. Og-hin-sha pumped a cartridge into the breach of his rifle and snapped on the safety before racing on.

Five sets the man had robbed before another trap-robber joined the trail. Og-hin-sha smiled grimly, reading the snow story. Here the wolverine he had been expecting had finally found the trap-line, and here the human thief had stood, studying the Devil Beast's trail and probably cursing it because it would spoil his looting. For once, Og-hin-sha was glad to see the evil wolverine's tracks.

Both robbers kept to the trap-trail, the wolverine to plunder and the other thief hoping the beast would leave the plundering to him. But the animal wrecked set after set, stealing bait and spoiling fur. And one day the trails left by the two trap-robbers Og-hin-sha the Stony swung along at a swift pace with his rifle ready for use.

The next set was the robber set, the end of the loop where he had placed the log pen and three traps to catch the wolverine. The Indian speeded, eager to see the result of his planning. And he was eager, too, to follow the man-thief's trail should he leave the trap-line when it curved back towards Og-hin-sha's cabin. The Indian was ready to follow, wherever the thief might go.

But the trail ended abruptly at the last set. Even as he had hoped, the wolverine had been baffled by the trapless pen and withdrew to circle the set. The first trap had caught the Devil Beast. Then the second trap-robber had come along, and the thief had cut a club and advanced to kill the cornered wolverine. Stepping close with his stick raised, the half-breed plunged into one of the two untrapped and hidden traps Og-hin-sha had set. The sudden snap of steel on his moss-covered foot had undoubtedly hurt; he had jumped with the pain and surprise of it. And that jump had been his undoing, for the man had stumbled and fallen to fall close to the trapped wolverine, and in one savage leap the cornered beast had reached the thief's broken throat and used its vicious teeth to kill.

Og-hin-sha stared a moment at the dead man, then raised his rifle and shot the other trap-robber, the snarling wolverine.

"A good robber-set," muttered the Stony, smiling grimly.

How to catch a cold

Colds are easily spread around by those who have them. For the benefit of the patient as well as others, it is wise to stay indoors, in bed if possible. Drinking plenty of water, milk and citrus fruit juices is helpful. Most important, the patient should keep away from other people, especially small children and babies. A disposable tissue should be held over nose and mouth when coughing or sneezing, to prevent the spread of germs.

Flooding takes nitrate from soil

OTTAWA—Many acres of low lying crop lands throughout the prairies are flooded every year for varying lengths of time during the spring runoff. F. D. Cook of the Soil Research Laboratory, Swift Current, Sask., advises that if spring flooded areas are cropped, 75 to 100 pounds per acre of 15-20-0 fertilizer should be applied at seeding time.

The productivity of excessively wet soils is influenced by biological changes in the soil resulting from temporary flooding. The most important of these changes is the breakdown of nitrate to gaseous forms of nitrogen which escape into the air. As a result the nitrates which might have been used by the plants are converted to a form of nitrogen that is useless for immediate crop needs.

This loss is brought about by a group of bacteria called the denitrifiers, which are present in every soil but are not active unless the soil is poorly aerated. In flooded soils, the air spaces are filled with water resulting in a complete lack of aeration, an ideal condition for the activity of these bacteria.

The great losses occur in fallowed soils that have been under water. During the fallow period most soils will build up nitrate nitrogen equal to an application of 45 to 90 pounds of ammonium nitrate per acre. All of this nitrogen which is available for crops is lost if the soil is saturated for a prolonged period.

This denitrification process is also influenced by temperature. If the soil is at 65 degrees F., the nitrates in fallow will generally disappear in two days; at 50 degrees F., in about one week and at 40 degrees F., they will disappear in about two weeks. Therefore it is not surprising that when fallow soils are flooded, no nitrate remains by the time the field is dry enough to cultivate.

Forfeit badge if found near flood waters

The city of Ithaca, New York, safeguards its children during annual Spring floods by appointing "high water deputies".

Toddlers to 12-year-olds are deputized with a large round badge after taking a pledge to keep away from flood waters. They also pledge to help keep other children away.

The idea was started in 1951 by the late Paul Kirchgraber and his wife. Their newstand and confectionery store was near one of Ithaca's elementary schools and Six Mile Creek.

The Kirchgrabers signed up 987 deputies the first year and during last year (1955) they had 2,280 members in the city of 7,200.

About 12 teenagers are appointed senior high water deputies. They make checks of the three creeks running through the town and the inlet to Cayuga Lake. If a youngster is found near the water he forfeits his badge.

Each year the children are rewarded with a party sponsored by 14 firms.

FORMED BEFORE BIRTH

Fingerprints are formed four months before birth and the pattern remains the same through life.

TAKE IT AGAIN — Russian Premier Nikolai Bulganin has a soccer fan's face as he is caught by a photographer during an unguarded moment. Startled by the flash, he told the photographer through an interpreter to "Take it Again". The second time his face was wreathed in the smile now familiar to Britishers.

A.A.U. of C. News

(By LOURNE DAVERNE, President Sask. Branch, A.A.U. of C.)

In Saskatchewan this year boxing, wrestling, track and field will take on an Olympic tinge. This year every boxer, wrestler and track man (and woman) will be imbued with the vision of a trip to Melbourne to compete against the world's best. Not everyone will be inspired enough to train seriously but year by year the amount of hard training increases and the ability and skill of our athletes improves.

In 1956 competitions have been so timed that summer-long training will be an advantage. The weather will not always be of the best but champions are made by fighting against obstacles. The athlete who wants to get into condition for his sport can do so if he times hard enough.

In the following paragraphs I will give you all the information necessary for you to know when competitions will be held, where they will be, and whom to contact to enter.

Track and Field
High school meets—
School meets. Unit meets. District meets, as decided by those concerned.

Provincial High School meet.
June 8 and 9.

Open meets—
July 6 and 7 Canadian Championships for Juvenile and Midget Women and Juvenile Men.

At this meet there will be events for junior men and midget men to round out a good program.

July 28 Saskatchewan open championships.

From this meet will be chosen athletes to attend the Olympic Trials at Hamilton, Ont. on August 24 and 25 and the Canadian Olympic Training Plan at the Canadian National Exhibition, Toronto, from August 27 to September 2.

Athletes attending all or any of the above meets must have amateur cards. Those entering the open meets must obtain the proper entry forms and send them in by the proper date.

Amateur cards and entry forms may be obtained (fees 50c senior

Canadian statistics report

(A Weekly Review)

Foreign Trade: Canada's commodity imports climbed to a new peak monthly value in March, reached a total for the first quarter almost 29 percent higher than last year. Exports were slightly lower in the month, but up 9 percent in the quarter. Re-surplus for the month and quarter were greatly larger import surpluses.

Prices: Wholesale prices generally moved upward in March. The Bureau's general price index rising 0.5 percent to bring it to a level 2.5 percent higher than a year earlier. Main increases were in the metals, non-metallic minerals and chemical products groups. Prices of both residential and non-residential building materials shared in the advance.

Manufacturing: March reports show further gains in production and shipments of such building materials as gypsum products, floor tiles, mineral wool, hard board and rigid insulating board. February rubber consumption was up, and shipments of stoves and furnaces.

Food: Milk production in the first quarter this year was an estimated 6 percent higher than last year, and fluid sales 7 percent larger. Sugar sales by manufacturers increased over last year in the three months.

Traffic Accidents: Deaths from motor accidents in Canada (excluding Quebec) increased last year to 2,084 from 1,960 in 1954, and the number of persons injured to 49,828 from 47,020. Nova Scotia, Manitoba and the Territories alone had fewer deaths.

Merchandising: Wholesalers' sales in the first two months this year were 10 percent greater than last year at an estimated \$1,001,414,000, with 14 of 18 types of business reporting gains.

Transportation: Railway car loadings were a sharp 18 percent higher in the week ending April 21 than a year ago, heavier grain loadings accounting for much of the rise.

Mining: Canadian coal production in the first quarter this year was larger than last year, in contrast with the trend of recent years, while landed imports were also larger. . . . Output of primary copper, nickel, silver and zinc continued to rise in February.

OVEREATING

Much of the world's superfluous flesh is caused by overeating. Too much high caloric food, especially if there is insufficient activity to expend the food, can add unwanted pounds. For anyone with a tendency to put on weight, a good basic diet is outlined in Canada's Food Rules. Between-meal snacks and too many helpings of rich pastries and cakes should be left out of the daily food intake.

More Comfort Wearing FALSE TEETH

Here's a pleasant way to overcome loose plate discomfort. FASTREX, an improved power-applied upper and lower plates holds them firmly so that they feel more comfortable. No gummy, gooey, pasty taste or feeling. It's alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTREX today at any drug counter.

WEEKLY BIBLE COMMENT

MAN IS A PARTNER IN DIVINE CONCEPT OF CREATION

The foundation of a great religion was laid when man dared to conceive of himself as made in the image and likeness of the God who made him. Here was spiritual insight, the full significance of which we can appreciate when we see the type of religion that had man covering before the forces of nature, or bowing down to grotesque idols.

The writer of Genesis saw man in God's image, with dominion over lesser creatures and with dominion over his world.

It is this view of man that is demonstrated throughout the centuries. Man, like God the Creator, is himself a creator.

He has conquered seas and oceans; he has bridged great rivers and chasms; he has ascended high mountains and delved far into the depths of the earth. In spite of the limitations of human weakness, we see man as exercising dominion.

God who created man is on the side of man to help strengthen him.

Man, consecrated to God, may live a life of faith above fear and anxiety. To seek first the kingdom of God and His righteousness is to establish all of life upon an unshakable foundation.

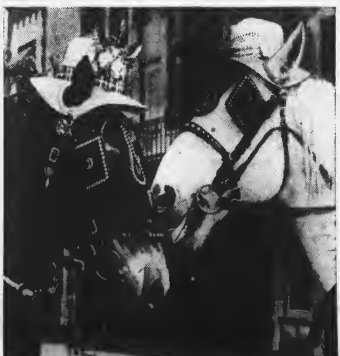

It is the tragedy of our times that God-like man should choose to make himself so devil-like, destroying where the whole purpose of God and of man at his best is to create and build.

The Bible is a great revelation of what man and human society could be, if men fulfilled the character and destiny for which God made them.

JUMPY MEETING

A heated debate in the town council chamber at Oudtshoorn, South Africa, was interrupted abruptly when a snake was seen to slither behind the chair of the town clerk. He jumped up and the councillors jumped, too, and all joined in the hunt.

The intruder was eventually caught and duly dealt with, and the debate continued.

HORSE OF A DIFFERENT COLLAR—All dolled up in spring bonnets, two working girls exchange the latest word going around in the horse set at Anaheim, Calif. Sleek and well cared for, they pull horse cars, relics of another era, at Disneyland amusement park.

JANET BLAIR, star of the films and TV, who has been signed to a long term contract for the Sid Caesar TV show. She will succeed Nannette Fabray who announced some time ago that she was forsaking her role as the comic's TV wife.

Personalities IN THE NEWS

Mr. and Mrs. G. May from Medicine Hat spent last week visiting their daughter and son-in-law Mr. and Mrs. J. Kerr at Chinook Cabins.

Mrs. A. Dewar has been confined to her home for the past two weeks through illness, her many friends wish her a speedy recovery.

Mr. and Mrs. A. Beveridge, accompanied by their daughter and son-in-law Mr. and Mrs. J. Robinson and family, were Waterton visitors on Sunday.

Mrs. K. Johnston and Mr. H. Bouthillier visited the former's daughters at Calgary last week.

Mr. and Mrs. W. Lonsbury and family were Waterton visitors on Sunday.

Mr. Bert. Bond is a patient in the Calgary General hospital.

Mrs. T. Hibbert of Edmonton, visited her mother, Mrs. Burrell over the week-end.

The Italian ladies held a very successful Mother's Day tea on Sat., May 12th. Tea prize was won by Mrs. Misknick, Cake raffle by Mrs. G. Atkinson and Tea Cloth by Mrs. J. Gurhenia.

Mr. and Mrs. Edgar Allen, Mr. and Mrs. J. Kerr and Mr. and Mrs. F. Graham attended the graduation ceremonies at Edmonton University last week when their sons graduated.

Mrs. Biggs of Medicine Hat was the week-end guest of Mrs. J. Derbyshire.

Eddy Cornett celebrated by entertaining 12 of his juvenile friends on May 10th, the occasion being his 7th birthday. A dainty lunch was served the table being centered with a beautifully decorated birthday cake. "Happy Birthday" was sung by all.

Mr. and Mrs. M. Cornett and son Eddy visited at Great Falls over the week-end.

Mr. Alex. Cornett of Delbourne spent the week-end in Coleman.

Mrs. Gladys Thomson of Calgary visited relatives over the week-end.

Mrs. Mable McFarland of Calgary visited her sister-in-law Mrs. E. Lonsbury over the week-end.

Mr. and Mrs. H. T. Halliwell of Fort Macleod visited their daughter and son-in-law, Mr. and Mrs. R. Pattinson last week-end while enroute to Fernie were they visited their daughter and son-in-law Mr. and Mrs. L. Moffatt.

Victoria Rebekah lodge held a successful tea and sale of work on Saturday. Door prize was won by Mrs. C. Picard and sheets and pillow case draw by Mrs. G. D'Amico.

Mr. and Mrs. J. Park and family spent the week-end at Radium Hot Springs.

Mr. and Mrs. P. Belter were recent visitors at Edmonton.

Miss L. Aboussafy of Calgary, spent the week-end with her parents, Mr. and Mrs. F. Aboussafy.

Victor Lemecha is now employed at Park's Grocery.

Mr. and Mrs. T. Kovach and daughter visited at Milk River over the week-end.

Mrs. Elizabeth Lonsbury celebrated her 84th birthday on Sunday last. Friends and relatives called to wish her Many Happy Returns of the day.

Mr. and Mrs. Robert Park are the proud parents of a daughter, born at the Magrath Hospital on Saturday May 19.

Mr. and Mrs. G. Atkinson, Mr. and Mrs. R. Montalbeti, Mrs. I. Spievak and Dave Ferrogatti were Calgary visitors recently, where they attended the professional tennis championship matches.

Due to an error the names of Vince Abrams of Pincher Creek, Josephine Petrosky and Harold Mark of Blairmore, as pianists for the entertainers at the Legion Ladies' Auxiliary rally were omitted.

Mr. Donald Joseph of Calgary, is visiting with his mother, Mrs. M. Joseph.

Miss Margaret Slaka, a student at the University of Alberta, is visiting with her parents, Mr. and Mrs. J. Slaka.

Mr. Robert Park, son of Mr. J. Park, will graduate on June 9th with a B.Sc. in petroleum engineering from the University of Oklahoma.

Mr. and Mrs. D. C. Sullivan and family of Great Falls visited latters parents Mr. and Mrs. R. Perry.

Card of Thanks

We wish to thank all our friends and neighbors for their kind words of sympathy during the loss of our beloved daughter, Debra. Our special thanks to Dr. E. J. Liesemer and the staff of the C. N. P. hospital.

Mr. and Mrs. Yoho Kimoto.

'Navy rat virus' is long-lived

A discovery made recently at the University of Michigan has revealed a circumstance hitherto unsuspected in the field of bacteriology. Certain assertion regarding viruses can, more or less, be taken as indisputable.

It is a well-known fact that nearly all of these microscopic organisms will live only a few weeks at the most after being removed from the living host cell, and there are many different kinds known to science.

However, while cleaning up an old laboratory, a test tube with living virus in it was found which had been there for 35 years! There is no doubt about the potency of this new discovery. Rats inoculated with one ten-billionth of a drop, containing the virus, survived only a few hours.

This virus was first made known to science in 1909 by Dr. Frederick C. Novy, and the test tube in which the long-lived sample was

found was in a laboratory formerly used by one of his assistants. Therefore, it will be appropriately named the "Novy Rat Virus."

The Catholic Womens League will hold a
